CSE 291/COGS 260:
Online & Technology-Enhanced Teaching

A graduate course offered in collaboration with
The Teaching + Learning Commons
The Office of Online + Technology Enhanced Education

Planning a career in academia?
Want to stand out in your job search?

Prepare yourself to utilize online and technological affordances to augment and improve student learning. This course will have a specific focus on ways in which online materials can support evidence-based learning practices—including those which occur in the face to face classroom. In this course you will create an online teaching artifact, leveraging research-supported best practices for inclusion in a teaching portfolio. Students with a specific course they would like to improve on campus are especially encouraged to apply.
